14.3.26 Great evening at the Superyacht Charities Ball in Southampton.
Thank you to Michelle Van der Merwe and Mark White at Pantaenius for hosting us.

Derek Munro, Liam Dobbin and the Superyacht Charities created a well-run event bringing the industry together.
Since 2015, the charity has grown year on year, raising significant funds for global causes.

In January we visited a yacht at Benetti in Livorno to support commissioning, completing installation in under an hour. Simple, plug-and-play setup with no disruption, allowing immediate testing and operation. Designed for captains and installers, it reduces complexity, avoids downtime, and ensures the system is ready to perform from day one on board. Press on the image for the LinkedIn article

Along with pantaenius, we had a personal tour at MB92 Barcelona during 48h in Barcelona. A highly coordinated refit yard with impressive infrastructure and strong environmental systems. We had great conversation over lunch into risk and insurance. It was a standout Superyacht Technology Show. Click the image for more information
